
The most efficient power conversion module in the industry!

The combination of innovative design, efficiency and reliability makes the Flatpack2 HE stand out. With efficiency up to 95.3%, the losses have been reduced by 50% compared to the current industry standard. Compared to older technologies with even poorer efficiency an investment in a Flatpack2 HE system is repaid in a few years by the reduced operating cost.

In a global perspective, considering the high energy consumption in the industry, this technology breakthrough can also have a significant environmental impact.

Applications

Industry
High efficiency rectifier for DC power supply facilities with or without battery. The module also operates with DC input, making it a versatile DC/DC Converter for stepping down a DC supply or act as a buffer to isolate branches.

All in all this make the Flatpack2 HE modules Industrial Building Blocks (IBB) with superior flexibility. Combined with other IBBs systems can be created for:

- Low & High Voltage switchgear
- Transformer & SUB Stations
- Power Generation & Distribution
- Emergency lighting systems
- Rail applications; Telecom, signaling and power conversion
- Industrial control systems
- Process and Heavy industry

Small and large
Due to the high power density, cost competitive design and a highly flexible system communication interface, Flatpack2 HE rectifiers are used in system solutions from 2kW to 192kW.

Product Features and Advantages

Flexibility and reliability
The FP2 modular concept has a lot of benefits compared to traditional solutions in the industry:

- High efficiency; less power consumption and heat dissipation
- Overall Size and footprint of cabinet: 50% of Thyristor Controlled Size
- Modular Hot Plug-in Construction allows
  - Redundancy, n+1, n+2... configurations
  - easy to do repairing: MTTR < 5 minutes
  - Very high MTBF > 350000 hours
- Wide input AC Voltage and Frequency range
- Possibility to build combined systems with rectifiers, DC/DC converters and inverters controlled by one controller

Global compliance
Eltek Valere is among the market leaders in all regions in the world, and designs the core products to be compliant to all relevant standards and customer requirements. All Flatpack2 rectifiers are CE marked and UL recognized.

Patents
Flatpack2 HE is a result of intensive research over many years. Several unique technical solutions, protected by patent applications, are introduced,
This FP2 can be used in these areas in a system

Plug and play
Plug a new rectifier into the system, and it automatically logs on, gets an assigned ID, downloads the system set parameters from the control system and starts up with a minimum of installation time, and without interrupting the system or attached equipment.

The Flatpack2 HE family covers application with output voltages from 22 to 290VDC. It is capable of taking both AC and DC input voltages of from 85 to 300V. This makes the Flatpack2 family the perfect choice to build a platform suitable to a wide range of applications.

Wide Output Range (WOR)
Wide DC output range to support battery banks of both NiCd and lead acid. For NiCd battery banks any number cells from 170 to 180 are fully supported.

Application example - Power up the riser
In areas with regular earthquakes it is regarded less likely that the batteries would fall over in the basement than in the upper floors. Distributing 24V or 48V from the basement and up requires large copper cables, and hence a solution is to distribute battery backed up 220VDC. As can be seen in the illustration next page, the Flatpack2 HE family is ideal for this application, because of its high efficiency, operates with both AC and DC input and also its wide output voltage range. (12VDC could also be provided with the use of Eltek Valere Micropack 12/120 WOR.)

Flexibility and reliability
Use of digital controllers in the Flatpack2 provides intelligent self-protective features like reduced output power at high temperatures and low mains. Flatpack2 rectifiers are also designed to have the highest possible immunity level and fulfill the IEC61000-6-5 (immunity, power station and substation) which is unique in the Industry.
Curves show power derating for Flatpack2 220/2000 HE and current derating for the Flatpack2 220/5A HE.

Additional Technical Specifications

| AC Input |  
| --- | --- |
| **Voltage** | 85-300 VAC/DC (Nominal 185 – 275 V) |
| **Frequency** | 0 to 66 Hz\(^1\) |
| **Maximum Current** | 11.9 A, maximum at nominal input and full load |
| **Power Factor** | > 0.99 at 1000 W load or more |
| **THD** | < 5% at nominal input and 2000 W load |
| **Input Protection** | o Varistors for transient protection  
o Mains fuse in both lines  
o Disconnect above 300 V |

\(^1\) (See previous page for frequency response)

| DC Output (floating) |  
| --- | --- |
| **Voltage Adjustable** | Default: 245.3 VDC (without controller)  
Range: 178.5-297 VDC (220 – 297 VDC without load) |
| **NiCd batteries** | Float charge: 1.40 – 1.45 VDC/cell  
Boost charge: 1.45 – 1.70 VDC/cell  
Standby/Test: 1.05 – 1.2 VDC/cell |
| **No of cells configurable in controller** | Min: 170 / Max: 180 |
| **Output Power** | 200 W at nominal input  
Constant Power > 2200 V > Constant Current |
| **Output Power** | 1100-1485 W at 220 – 297 VDC and nominal input  
Constant current 0 – 297 VDC |
| **Maximum Current** | 9.16 Amps at 220 VDC and nominal input |
| **Maximum Current** | 5 A at 0-297 VDC and nominal input |
| **Current Sharing** | < 5% of maximum current from 10 to 100% load |
| **Static voltage regulation** | < 0.5% from 10% to 100% load |
| **Dynamic voltage regulation** | < 5.0% for 10-80% or 80-100% load variation, regulation time < 50 ms |
| **Hold up time** | > 20 ms; output voltage > 178 VDC at 1500 W load |
| **Ripple and Noise** | < 1000 mV peak to peak, 30 MHz bandwidth |
| **Output Protection** | o Overvoltage shutdown  
o Hot plug-in  
o OR-ing diode  
o Short circuit proof  
o High temperature protection |

\(^2\) Specifications are subject to change without notice

| Other Specifications |  
| --- | --- |
| **Efficiency** | > 95% at 35-65% load (241115.815)  
> 95% at 45-95% load (241115.815B) |
| **Isolation** | 3.0 KVAC – input to output  
1.5 KVAC – input to earth  
1.5 KVDC – output to earth  
3.0 KVAC – CAN to primary  
3.0 KVAC – CAN to secondary |
| **Alarms:** | o Low mains shutdown  
o High temperature shutdown  
o Rectifier Failure  
o Overvoltage shutdown on output  
o Fan failure  
o Low voltage alarm  
o CAN bus failure |
| **Warnings:** | o Low temperature shutdown  
o Rectifier in power derate mode  
o Remote battery current limit activated  
o Input voltage out of range, flashing at overvoltage  
o Loss of CAN communication with control unit, standalone mode |
| **Visual indications** | o Green LED: ON, no faults  
o Red LED: rectifier failure  
o Yellow LED: rectifier warning |
| **Operating temp** | -40 to +75°C (-40 to +167°F), derating above  
+55°C (+131°F) to 1350 W at +75°C (+167°F) |
| **Storage temp** | -40 to +85°C (-40 to +185°F) |
| **Cooling** | Fan (front to back airflow) |
| **Fan Speed** | Temperature and load regulated |
| **MTBF** | > 459,000 hours Telcordia SR-332 Issue I, method II (ambient > 45°C) |
| **Acoustic Noise** | < 40 dBA at nominal input and full load (ambient > 25°C)  
< 58 dBA at nominal input and full load (ambient > 40°C) |
| **Humidity** | Operating: 5% to 95% RH non-condensing  
Storage: 0% to 99% RH non-condensing |
| **Dimensions** | 109 x 41.5 x 327 mm (wxhxd)  
(4.25 x 1.69 x 13”) |
| **Weight** | 1.950 kg (4.3 lbs) |
