Flatpack2 48/2000 HE Rectifier Module

The most efficient rectifier in the industry!

The combination of innovative design, efficiency and reliability makes the Flatpack2 HE stand out. With an efficiency up to 96.5%, the losses have been reduced by 50% compared to the current industry standard.

In a global perspective, considering the high energy consumption in the telecom industry, this technology breakthrough is not only reducing operational cost for the operators, but it can also have a significant environmental impact.

Applications

Wireless, fiber and fixed line communication
Today’s communications demand state of the art, cost effective and compact DC power systems. Flatpack2 HE delivers an industry leading power density and superb reliability at lowest lifetime cost.

The HE rectifier also has an extremely high efficiency at low load, which historically has been a drawback with most modern soft switching technologies.

Broadband and network access
Increasing network speed demands flexible and expandable DC power solutions. The Flatpack2 HE rectifiers are your key building blocks for future needs.

Small and large
Due to the high power density, cost competitive design and a highly flexible system communication interface, Flatpack2 HE rectifiers are used in system solutions from 2kW to 192kW.

Product Features and Advantages

Flexibility and reliability
Extensive use of digital controllers has enabled advanced functionality to meet most customers’ requirements. It also provides intelligent self-protective features like reduced output power at high temperatures or low mains.

Plug and play
Plug a new rectifier into the system, and it automatically logs on, gets an assigned ID, downloads the system set parameters from the control system and starts up with a minimum of installation time, and without interrupting the system or attached equipment.

The HE rectifier is made fully compliant with the standard Flatpack2 rectifier which means it can be used in any FP2 system solutions, whether it is in new installations, site expansions or replacement programs.

Global compliance
Eltek Valere is among the market leaders in all regions in the world, and designs the core products to be compliant to all relevant standards and customer requirements. All Flatpack2 rectifiers are CE marked, UL recognized and NEBS compliant.

Patents pending
Flatpack2 HE is a result of intensive research over many years. Several unique technical solutions are introduced, protected by patent applications.

**Efficiency**

- Efficiency: >96% at 30-70% load
- Isolation: 3.0 KVAC – input and output
- 1.5 KVAC – input earth
- 0.5 KVDC – output earth

**Alarms:**
- Low mains shutdown
- High temperature shutdown
- Rectifier Failure
- Overvoltage shutdown on output
- Fan failure
- Low voltage alarm at 43.5V
- CAN bus failure

**Warnings:**
- Low temperature shutdown
- Overvoltage shutdown
- Remote battery current limit activated
- Input voltage out of range, flashing at overvoltage
- Loss of CAN communication with control unit, stand alone mode

**Visual indications**
- Green LED: ON, no faults
- Red LED: rectifier failure
- Yellow LED: rectifier warning

**Operating temp**
- -40 to +75°C (-40 to +167°F), output power derates linear to 1200 W at +75°C (derating starts at +45°C (+113°F))

**Storage temp**
- -40 to +85°C (-40 to +185°F)

**Cooling**
- Fan (front to back airflow)

**Fan Speed**
- Temperature and current regulated

**MTBF**
- > 350, 000 hours Telcordia SR-332 Issue I, method III (T<sub>ambient</sub>): 25°C

**Acoustic Noise**
- < 20dBA at nominal input and full load (T<sub>ambient</sub> <= 25°C)
- < 56dBA at nominal input and full load (T<sub>ambient</sub> > 40°C)

**Humidity**
- Operating: 5% to 95% RH non-condensing
- Storage: 0% to 99% RH non-condensing

**Dimensions**
- 109 x 41.5 x 327mm (wxhxd)
- (4.25 x 1.69 x 13"

**Weight**
- 1.950 kg (4.3lbs)
